& purchase Mechanical  
Systems & Components.\***

The magazine of The American Boiler Manufacturers Association (ABMA), *Today's Boiler* reaches 16,057 engineers with hydronic/steam heat system design/specification influence.\*\*

Dedicated to the advancement and growth of the boiler and combustion equipment industry, *Today's Boiler* targets consulting, mechanical and facility engineers. *Today's Boiler* mails with *Engineered Systems* in May and November and is also sent to our 10,000+ *ES* digital subscribers—reaching a total of 25,000+ engineers!

## EDITORIAL HIGHLIGHTS

**GOING "BRO"** - A Maine college shifts to bioresidual oil (BRO) as part of its campus heating overhaul.

**UP CLOSE & PERSONNEL** - When it comes to boilers, there are more reasons than one might think for end-users to have a properly trained workforce for maintenance and operations.

**DRONES!** - Facilities are finding out that drones can represent a safer method for performing inspections and some maintenance steps on certain larger equipment.

**CODES & COMBUSTIBLES** - ABMA staff weigh in with the latest on combustion explosions and codes/standards developments.

**SPRING ISSUE Ad close: April 2 - FALL ISSUE Ad close: October 8**

**15%  
RATE DISCOUNT  
FOR ABMA MEMBERS!**
